## Calculation Policy

(Reviewed 2024)

# Guidance for teachers

The calculation policy is divided into four sections: addition, subtraction, multiplication and division. At the start of each section, you will find an overview of the progression of skills. Calculations involving decimal numbers and fractions are included.

The calculation policy follows the same concrete, pictorial, abstract approach as our main schemes of learning. Where appropriate, sentence stems and key questions are included alongside the key representations.

Where skills are divided into more than one section across the page, there is a progression in the level of difficulty from left to right.

For example, when adding across a 10, children need to be able to add across 10 itself, before making links with related facts.

<b>Reception</b>	<ul style="list-style-type: none"> <li>• Have a deep understanding of number to 10, including the composition of each number.</li> <li>• Subitise (recognise quantities without counting) up to 5</li> <li>• Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 and some number bonds to 10, including double facts.</li> <li>• Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally.</li> </ul>
<b>Progression of skills</b>	<b>Key representations</b>
<b>Sharing</b>  Provide practical activities such as sharing items during snack time. Encourage children to check whether items have been shared fairly (equally).	<p>There are ... altogether. They are shared equally between ... groups.</p> 
<b>Grouping</b>  Provide opportunities to make equal groups when tidying up or during snack time. Encourage children to check that each group has the same amount.	<p>There are ... groups of ... There are ... altogether.</p> 

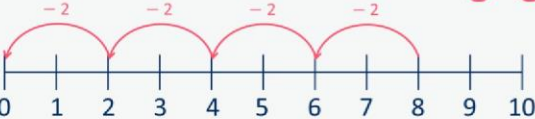

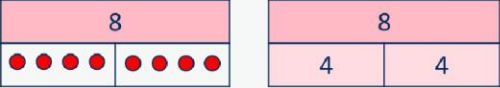

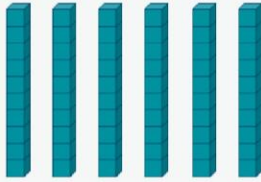

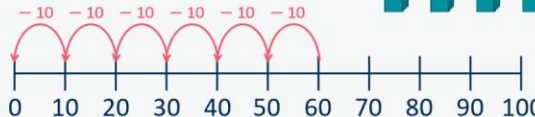

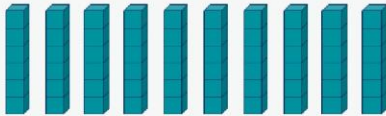

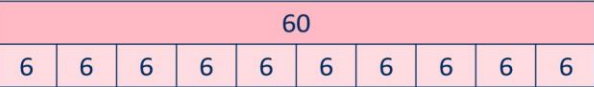

# Division

<b>Year 1</b>	<ul style="list-style-type: none"> <li>Solve simple onestep problems involving division, using concrete objects, pictorial representations and arrays with the support of the teacher.</li> <li>Recognise, find and name a half as one of two equal parts of a quantity.</li> <li>Recognise, find and name a quarter as one of four equal parts of an object, shape or quantity.</li> </ul>		
<b>Progression of skills</b>	<b>Key representations</b>		
<p><b>Make equal groups-grouping</b></p> <p>Encourage children to physically move objects into equal groups. They can also circle equal groups when using pictures.</p>	<p>There are ... altogether.
